1.		To Implement CI/CD using Jenkins and to deploy a Smart Notice Board Website	1	

DATE :

To implement CI/CD using Jenkins and to deploy a Smart Notice Board Website

Aim

To implement the CI/CD using the Jenkins and to deploy a Smart Notice Board Website in the live server.

Tools required

- Jenkins
- GitHub
- Git
- Vercel

Procedure

Step 1: Create Simple Web Page (folder named *jenkins-demo*).

Step 2: Inside create file: *index.html*

Step 3: Write the code in the *index.html*.

Step 4: Go to GitHub and create a repository named *jenkins-demo*

Step 5: After creating the repo run the below code in the command prompt terminal.

- git remote add origin <https://github.com/your-username/jenkins-demo.git>
- git branch -M main
- git push -u origin main

Step 6: Install the Jenkins and go to Jenkins dashboard and click new item and name it *jenkins-pipeline* and select *pipeline* and *click ok*.

Step 7: Now configure the pipeline by scrolling down to the pipeline and paste the below code in the pipeline script:

```
pipeline {
    agent any
    stages {
        stage('Clone') {
            steps {
```

```

        git branch: 'main', url: 'https://github.com/username /jenkins-
demo.git'
    }
}
stage('Build') {
    steps {
        echo 'Building project...'
    }
}
stage('Deploy') {
    steps {
        bat 'if not exist C:\\deploy mkdir C:\\deploy'
        bat 'xcopy * C:\\deploy /E /I /Y'
    }
}
}
}
}
}

```

Step 8: After copying the code click *save*

Step 9: To enable Auto CI/CD in Jenkins go to the triggers and enable *Poll SCM*

Step 10: After ticking a box will appear, type ********* there

Step 11: Now click *save*.

Step 12: Now the next step is to deploy the website to the server

Step 13: Install the vercel and click *Add New* then *Project*

Step 14: Import the Jenkins-demo from the GitHub and click *deploy*

Step 15: Now vercel will:

- Pull your code
- Deploy it
- Give a URL like:

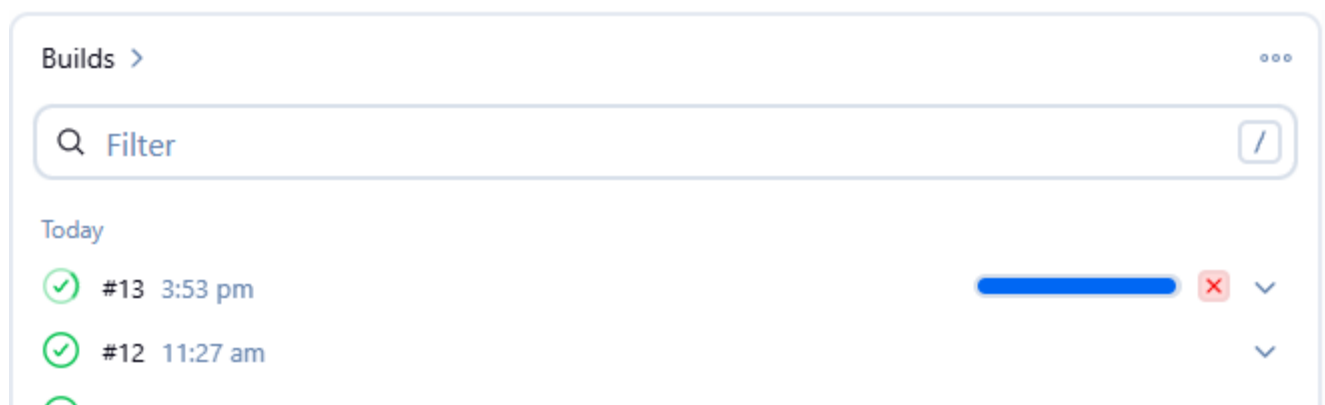

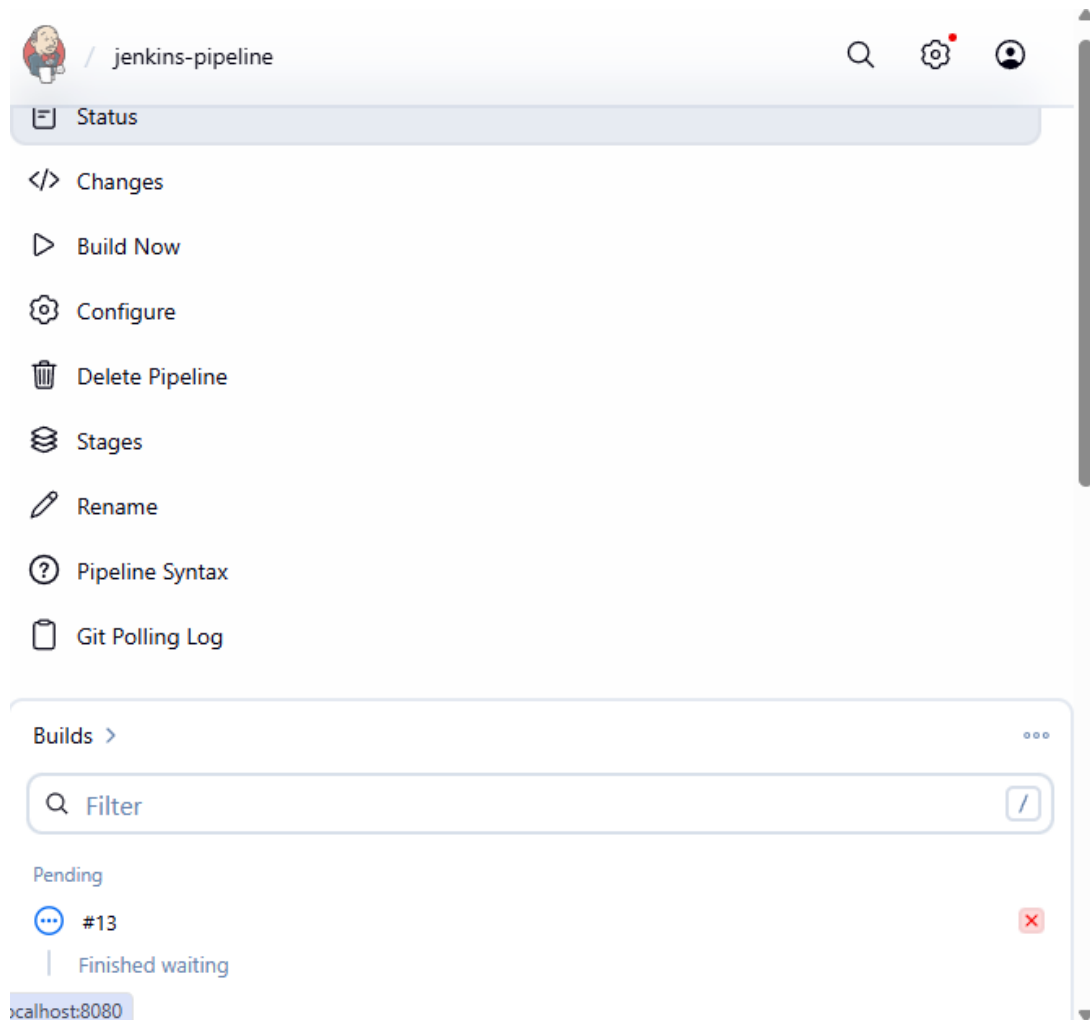

<https://jenkins-demo-xxxx.vercel.app>

Step 16: Now Push the code to the GitHub and type the following in the command prompt terminal:

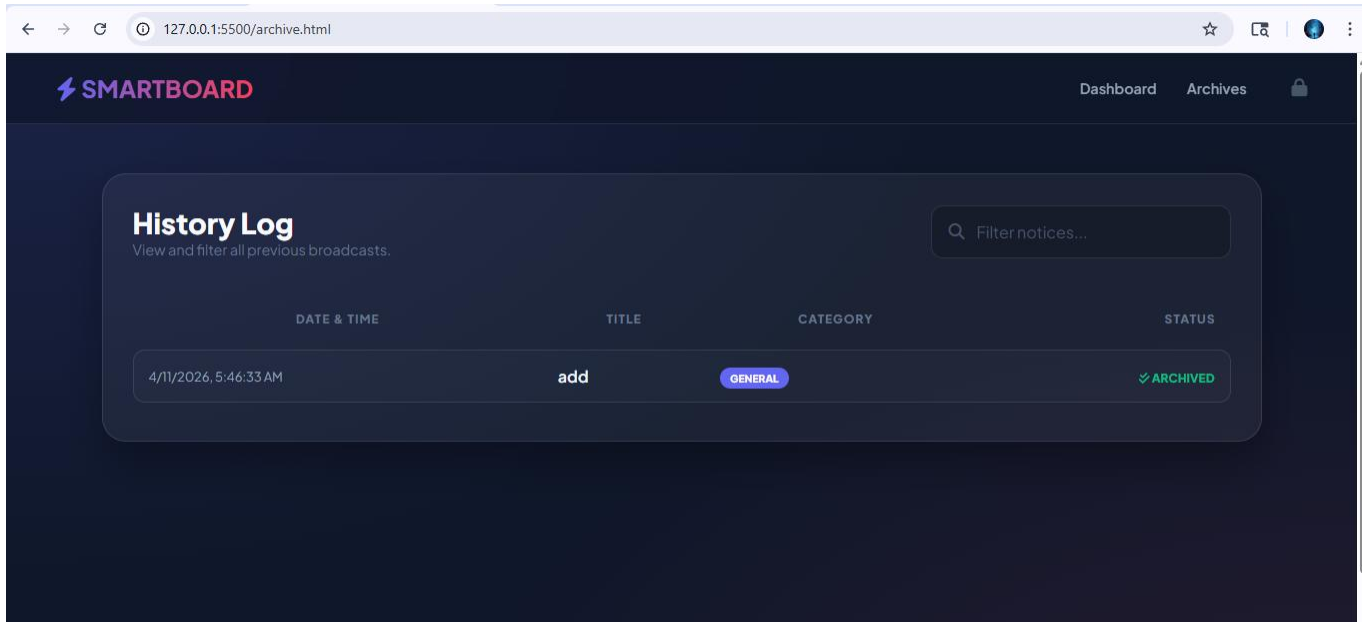

- git add .
- git commit -m "test1"

- git push

Step 17: Now the code will be pushed to the GitHub and Jenkins will auto run the job and build the job and deploy to the vercel:

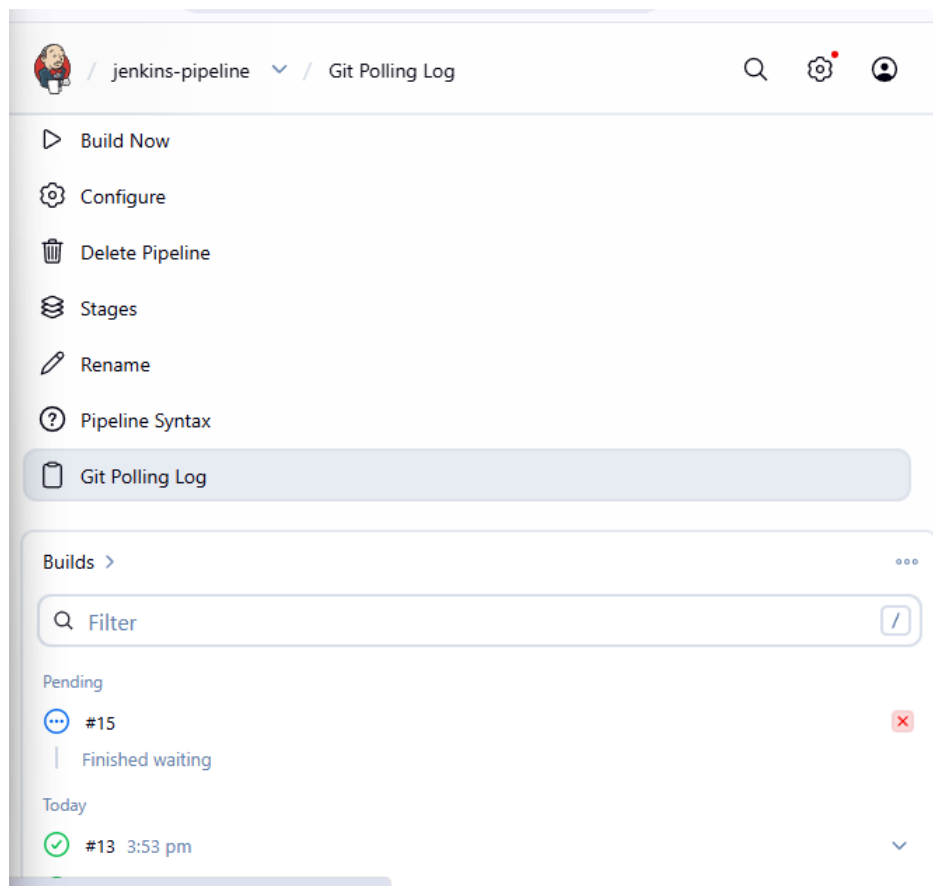

Step 17: Now after auto deployment the website will be live to the user:

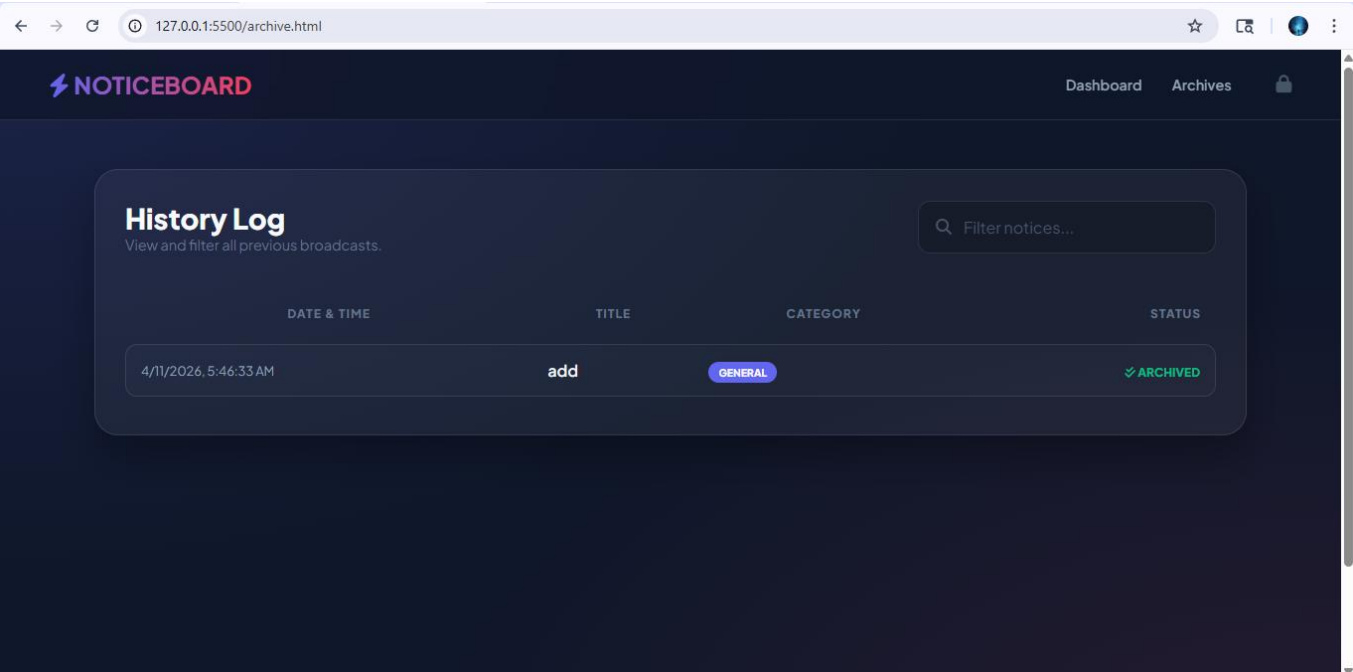

Step 18: Now make some changes in the code like changing the heading of the website. In our project the SMARTBOARD is changed to NOTIEBOARD.

Step 19: Now again only push the code to the GitHub:

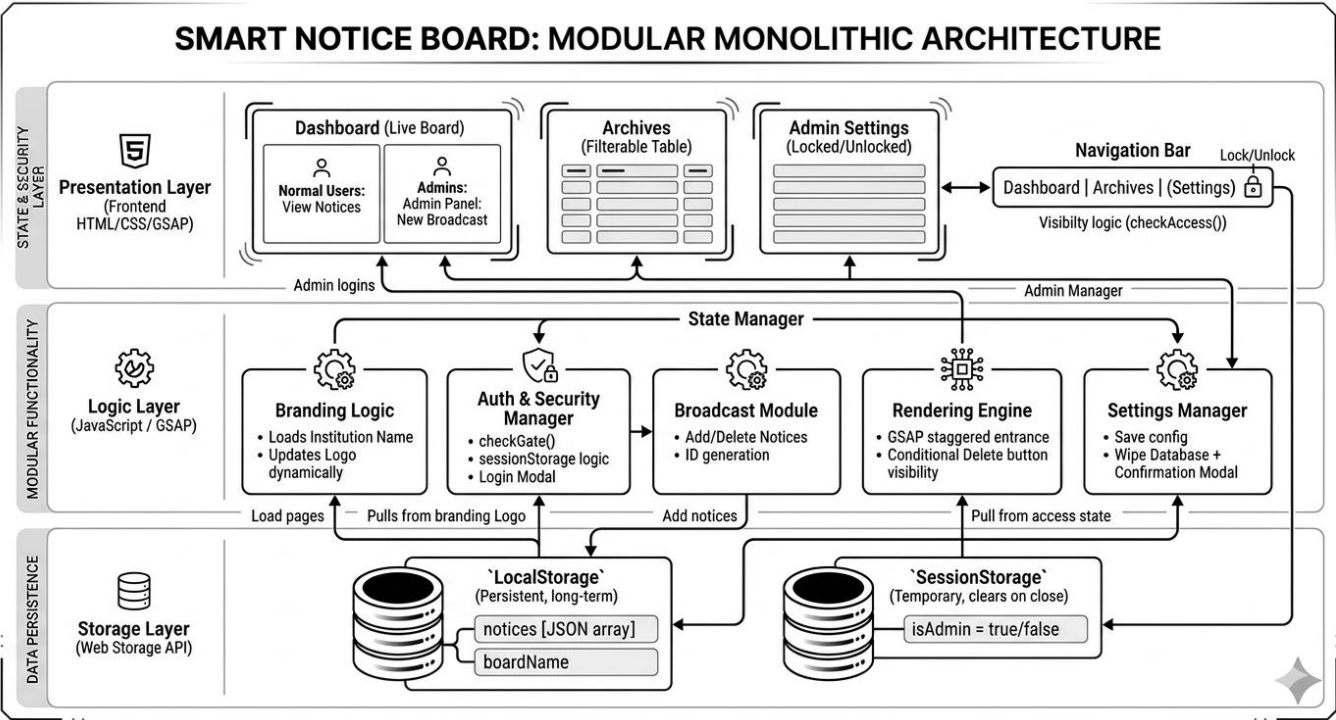

- `git add .`
- `git commit -m "test2"`
- `git push`

Step 20: Now refresh the URL to see the implementation of CI/CD using the Jenkins :

Architecture:

GitHub Repository Link:

<https://github.com/SriJainthu/jenkins-demo>

Deployment Link:

jenkins-demo-one.vercel.app

Certificates in Infosys Springboard:

1. Introduction to Agile methodology

2. Continuous Integration and Delivery - DevOps

COURSE COMPLETION CERTIFICATE

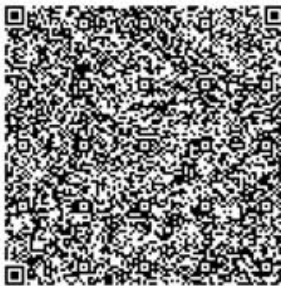

The certificate is awarded to

sri jainthu K

for successfully completing the course

Continuous Integration and Delivery - DevOps

on April 6, 2026

Congratulations! You make us proud!
